MAYORAL MINUTE

a4 [MM] Mayoral Minute - Dual Reticulation of Greenfield Sites

Councillors,

COUNCILLOR WORKSHOP - DUAL RETICULATION IN GREENFIELD SITES

To provide Councillors with a greater understanding of Dual reticulation, it is proposed that a workshop be held which will allow staff to present the latest information regarding the experience of other Water Authorities and the technical aspects and cost implications of this form of re-use.

RECOMMENDATION:

That:-

A workshop is held for Councillors on the technical aspects of dual reticulation in Greenfield sites. The workshop should cover issues of cost and potential benefits as well as other engineering considerations, impact on long term demand management objectives and details, if possible, of the experience of other Local Government Areas that have implemented these measures.
