In summary the residential component of the ellipsoid towers necessitates:

- 71.7 spaces for the dual use units (62 units)
- 42 spaces for the tourist uses (42 Units)
- 84 spaces for the residential uses (56 Units)
- 4.280 spaces for the work/office space associated with the dual flexi units (Lots 1-8)

Therefore a minimum of **201.98** onsite parking spaces for the 160 Units as approved by both DA08/0907.07 and DA13/0247 is required, with 16 of these spaces having to be available for visitor use.

However, if all units were to convert to dual use units utilising the new B2 car parking rates the site would only need to accommodate 186.557 onsite parking spaces for the residential uses (145 units x 1.1 spaces and 15 units x 1.6 spaces and 3.057 for the flexi work/office areas).

Total Stage1 Ultima parking comprises 201.98 residential spaces plus 42.2934 commercial spaces which equates to **244.27 spaces**

There are 263 spaces approved and constructed under the ellipsoid towers.

Therefore the development caters for adequate onsite parking for both the commercial component and residential component leaving a surplus of 18.7 spaces which other unit holders and or commercial uses could utilise.

It should also be noted that the applicant submitted a car parking analysis (with DA08/0907.07) by Bitzios Consulting which concludes that occupancy surveys showed 71% for a typical weekday and 66% for a typical weekend day and accordingly if Council adopted the new rates in B2 there would be no adverse parking impacts.

However, this traffic report does not provide detail on the occupancy of the units at this time.

Notwithstanding, the application proposes 208 spaces in the residential strata and 55 spaces in the non accommodation strata.

Given the above assessment DA13/0942 and DA08/0907.07i are both recommended for approval with conditions requiring the Stratum to reallocate 21 spaces from the common property of the Residential Strata Plan 79995 to common property of the Non Residential Accommodation Strata Plan 80159.

The applications are therefore considered to comply with the relevant policies and controls.
