LISMORE CITY

**Broad Vegetation Communities**

- Rainforest and Riparian Communities
- Sclerophyll Open Forests on Bedrock Substrates
- Sclerophyll Forests / Woodlands on Sand Substrates and Alluvium
- Melaleuca and Swamp Oak Forests
- Estuarine Complexes
- Sedgeland and Related Communities
- Heathlands
- Foredune Complex
- Highly Modified / Disturbed (includes forest plantations)
- Miscellaneous Map Units (includes 998 - Not Assessed)

See accompanying report for details and discussion of mapped categories.

See Map 2. for details of specific vegetation types.

SOURCES:

- National Park
- Open Water
- Property/Road Boundary

Bushland boundaries derived from colour orthophotos dated 26/7/2001 (east of ISG 346000E) and 10/9/2000 (west of ISG 346000E).

Vegetation typing from various sources - see Map 2 and accompanying report for further details.

Approximate scales at the indicated page size:  
 A0 - 1:60000  
 A1 - 1:85000  
 A2 - 1:120000  
 A3 - 1:175000

Coordinate System - ISG (Zone 56/2)  
 Datum - AGD 1966

VEGETATION MAPPING and INTERPRETATION : J.W. Turnbull, M.B. Kingston, M. S. Healey  
 GIS and MAP LAYOUTS: M.B. Kingston
