**Subject:** (DWS Doc No 49806244) Marine Parade Project

Hello Patrick,

I would like to thank you and your team for meeting with Don, Paul and myself this morning to discuss the proposed traffic calming and increased parking in Marine Parade. It appears that your Officers are working towards providing the same positive outcomes for pedestrians and business owners as the Kingscliff Chamber Executive.

Your concept drawings are exactly the in line with the ideas that were presented and accepted by over 50 business representatives at our February Breakfast Meeting.

From my understanding of discussions this morning,

1. Council already has finance available from Developer contributions to provide parking in Kingscliff,
2. A majority of the work utilises the current roadway with modified markings on the current bitumen with minimal construction work.

The Chamber Executive will fully support your efforts to convert these concepts into reality as a matter of urgency, hopefully before the arrival of the Summer visitors this year.

As suggested this morning, I have attached the Presentation slides showing the images from Terrigal that we used for a comparison at our February meeting.

Please let me know when we can be of further assistance.

Regards,  
Dennis Eyre
